

This reconnaissance-level, aggregate potential map is derived from published information, aerial photograph interpretation and limited field checking. As such, deposit outlines are assumed and material descriptions are either assumed or approximate. The sources of information used to produce this map are listed below and terms used in the legend are defined in the ternary diagram.

- Deposit Categories**
- a** Sand. Gravel is estimated to be less than 15% of the total sediment. One or more sites are described in each deposit.
 - b** Sand. Gravel is estimated to be less than 15%. Deposits not field checked.
 - c** Sand. Gravel is estimated to be less than 1% of the total sediment. One or more sites are described in each deposit.
 - d** Sand. Gravel is estimated to be less than 1%. Deposits not field checked.
- 3a** Deposit number and category
- Assumed boundary from air photo interpretation
 - Active or inactive pit
 - Sample and/or description site

Geology and compilation 1988-89
Figure 3
This sand and gravel resource map was prepared by the Alberta Geological Survey as part of an ongoing aggregate inventory of Alberta. This information shown on this map is intended for general land-use planning, land management and aggregate exploration until such time as more detailed maps or reports are available for the area.
